

Biodegradable

✓ 100% biodegradable open rigid card holder

Our rigid cardholders are available in **16 different colors, 100% biodegradable and fully recyclable**. Transparent, Black, Red, Dark Blue, Light Blue, Royal Blue. Orange, dark green, white, purple, gray, pink, light green, navy blue, NHS blue and yellow. The backing will degrade naturally in 5-10 years of normal use.

TECHNICAL SPECIFICATIONS

Material	Polypropylene and ETL additive
Suitable for food contact	Yes
BPA free	Yes
Storage	Store below 120 degrees
Manufacture in	Europe
Package units	100 per package
Package dimensions	21.5cm (L) x 19cm (W) x 7cm (H)
Recyclable	100% recyclable backing and packaging
Warranty	2 years
Weight	697 grams

ADDITIONAL INFORMATION: Our biodegradable cardholders include a **natural additive** that uses a process known as anaerobic digestion (AD), which remains inactive until subjected to microbe-rich anaerobic environments, such as those found in landfills and oceans. The polymer chains break down and the microbes consume the plastic material, leaving only organic residues (humus) and methane, which is captured and used as a source of clean energy (biogas).

Our biodegradable additive complies with EU Framework Regulation (EC) No 1935/2004 and (EU) No 10/2011. (Plastics Regulation). Tested according to ASTM D5511, ASTM D5988 and ASTM D6691. Our biodegradable card holders also comply with FDA (food compliant) and Federal Food, Drug and Cosmetic Act, as well as all food additive regulations.
